Origin and Breeding History of the Variety

R/s 10/27/87 5/3/88

~~WATKINS~~

1. ~~WATKINS~~ K86 was developed by King Agro Inc., Chatham, Ontario. This variety originated from a hand-pollinated cross of B216R x T215 made in 1980. The F₁, F₂, F₅ and F₆ generations were grown in Ontario and the F₃ and F₄ grown in Belize, Central America. Early generations were advanced using a modified single seed descent technique. ~~WATKINS~~ K86 was F₆ derived and was yield tested in 1986. The variety was selected for small seed size and high yield.
2. In 1982, single plants of the variety were reselected and grown in a winter nursery in Chile (1982-1983). Rows conforming to a standard were harvested and bulked to establish breeder seed. The genetic make-up of the variety was uniform and stable in subsequent generations.
3. ~~WATKINS~~ K86 was placed in yield trials in 1986. Data is attached.

Novelty Statement

Novelty is based on the unique combination of the following characters:

~~NATTO KING~~ 12/5 10/27/87 5/3/88

~~NATTO KING~~ K86 is a small-seeded cultivar most similar to Canatto, except NattoKing K86 is 14 days later, 9 cm shorter, 1.4 gms per 100 seeds lighter and 167 kg/ha higher yielding than Canatto. Its small seed size makes it suitable for the Natto food market in Japan.
